### Feedback

Grade	94.0 / 100.0
Graded on	Monday, 21 November 2022, 10:01 PM
Feedback comments	<div><div>—</div><div>well done! Good job, just missing in feeling for using the ERF, as feeling part must be corresponded to the event description that you have discussed previously. And for action plan..action plan highlights the value that you have gained such as respect but need to more details to make sure that the key takeaways are well taken. suggest that you split the action plan following the event hence it is easier for you to maintain the structure of your context for action plan as well as to be able write in-depth analysis for every of the afromentioned events. example of a good action plan for event 1 : "When I'm working on a research project next time, I would try to not fall victim to confirmation bias by going out of my way to search for evidence that supports my hypothesis." This is a good example of a research project that is well planned and executed. The student has clearly identified the research question and the key takeaways from the event. The student has also provided a clear action plan for the future. The student has demonstrated a good understanding of the research process and the importance of critical thinking. The student has also demonstrated a good understanding of the importance of evidence in research. The student has also demonstrated a good understanding of the importance of communication in research. The student has also demonstrated a good understanding of the importance of ethics in research. The student has also demonstrated a good understanding of the importance of integrity in research. The student has also demonstrated a good understanding of the importance of honesty in research. The student has also demonstrated a good understanding of the importance of transparency in research. The student has also demonstrated a good understanding of the importance of accountability in research. The student has also demonstrated a good understanding of the importance of responsibility in research. The student has also demonstrated a good understanding of the importance of respect in research. The student has also demonstrated a good understanding of the importance of empathy in research. The student has also demonstrated a good understanding of the importance of compassion in research. The student has also demonstrated a good understanding of the importance of kindness in research. The student has also demonstrated a good understanding of the importance of generosity in research. The student has also demonstrated a good understanding of the importance of humility in research. The student has also demonstrated a good understanding of the importance of modesty in research. The student has also demonstrated a good understanding of the importance of simplicity in research. The student has also demonstrated a good understanding of the importance of clarity in research. The student has also demonstrated a good understanding of the importance of precision in research. The student has also demonstrated a good understanding of the importance of accuracy in research. The student has also demonstrated a good understanding of the importance of reliability in research. The student has also demonstrated a good understanding of the importance of validity in research. The student has also demonstrated a good understanding of the importance of objectivity in research. The student has also demonstrated a good understanding of the importance of impartiality in research. The student has also demonstrated a good understanding of the importance of fairness in research. The student has also demonstrated a good understanding of the importance of justice in research. The student has also demonstrated a good understanding of the importance of equity in research. The student has also demonstrated a good understanding of the importance of equality in research. The student has also demonstrated a good understanding of the importance of freedom in research. The student has also demonstrated a good understanding of the importance of peace in research. The student has also demonstrated a good understanding of the importance of harmony in research. The student has also demonstrated a good understanding of the importance of unity in research. The student has also demonstrated a good understanding of the importance of solidarity in research. The student has also demonstrated a good understanding of the importance of cooperation in research. The student has also demonstrated a good understanding of the importance of collaboration in research. The student has also demonstrated a good understanding of the importance of teamwork in research. The student has also demonstrated a good understanding of the importance of leadership in research. The student has also demonstrated a good understanding of the importance of management in research. The student has also demonstrated a good understanding of the importance of organization in research. The student has also demonstrated a good understanding of the importance of planning in research. The student has also demonstrated a good understanding of the importance of execution in research. The student has also demonstrated a good understanding of the importance of evaluation in research. The student has also demonstrated a good understanding of the importance of reflection in research. The student has also demonstrated a good understanding of the importance of learning in research. The student has also demonstrated a good understanding of the importance of growth in research. The student has also demonstrated a good understanding of the importance of progress in research. The student has also demonstrated a good understanding of the importance of achievement in research. The student has also demonstrated a good understanding of the importance of success in research. The student has also demonstrated a good understanding of the importance of fulfillment in research. The student has also demonstrated a good understanding of the importance of happiness in research. The student has also demonstrated a good understanding of the importance of well-being in research. The student has also demonstrated a good understanding of the importance of health in research. The student has also demonstrated a good understanding of the importance of happiness in research. The student has also demonstrated a good understanding of the importance of well-being in research. The student has also demonstrated a good understanding of the importance of health in research.</div></div>

contradicting information on the topic that I'm researching on. Besides that, I should manage my time properly by making sure that I'm not experiencing the Dunning-Kruger effect. I would do this by allocating more time to learning the topic before thinking I'm competent enough to complete it quickly. I've learnt a few technical skills such as using the intelligent research cycle's steps and Google search operators. For example, next time when I'm collecting data and information using the intelligent research cycle, I would develop a plan that checks the relevance of the sources and narrow them down using Google search operators like the "OR" operator. If I wanted to research about climate change, I could search for "climate change OR global warming" to narrow down results. In terms of collecting data for research, I would also use the "analysis" step in the intelligent research cycle to check the currency, accuracy, authority, accessibility, and stability of the data. A couple of values that I will use in the future is time management and humility. I should be humble and not overestimate myself in future projects, and I should definitely allocate more time for me to comprehend something before diving right into it. These things that I've learnt would serve as a reminder for my future research-based project". overall, good reflective!!
