

FIT2081 Mobile application development - S1 2023 MUM

[Dashboard](#) / [My units](#) / [FIT2081 - S1 2023 MUM](#) / [Week 2](#) / [Week 2 - Lab Tasks](#)

Lab Specifications

Develop a single activity application that represents a Book Store management application. The following attributes represent each book:

- ID
- Title
- ISBN
- Author
- Description
- Price

Task 1: Add the attributes (see above) to the main activity

Task 2: Add a button to the activity responsible for showing a toast with a message confirming the book's title and price.

Task 3: Add a button to the activity responsible for clearing all the input fields.

The expected output (but not limited to) is depicted below:

ExpectedOutput-W2

Marking Rubric

	Unsatisfactory	Poor	OK	Good	Outstanding
Task 1	No code is provided and/or unable to answer all the interview questions <i>0points</i>	There is an attempt to code the task but could not finish it and/or unable to answer most of the questions <i>1points</i>	The task is almost completed but not functioning well and/or unable to answer some of the questions <i>2points</i>	The task is complete but the explanation during the interview is not enough <i>3points</i>	The Implementation is perfect and able to answer all the questions correctly. <i>4points</i>
Task 2	No code is provided and/or unable to answer all the interview questions <i>0points</i>	There is an attempt to code the task but could not finish it and/or unable to answer most of the questions <i>1points</i>	The task is almost completed but not functioning well and/or unable to answer some of the questions <i>2points</i>	The task is complete but the explanation during the interview is not enough <i>3points</i>	The Implementation is perfect and able to answer all the questions correctly. <i>4points</i>
	No code is provided and/or unable to answer	There is an attempt to code the task but	The task is almost completed but not functioning well	The task is complete but the explanation	The Implementation is perfect and able to answer all the questions correctly.

Task 3	all the interview questions <i>0points</i>	could not finish it and/or unable to answer most of the questions <i>1points</i>	and/or unable to answer some of the questions <i>2points</i>	during the interview is not enough <i>3points</i>	correctly. <i>4points</i>
Extra Task	No code is provided and/or unable to answer all the interview questions <i>0points</i>	There is an attempt to code the task but could not finish it and/or unable to answer most of the questions <i>1points</i>	The task is almost completed but not functioning well and/or unable to answer some of the questions <i>2points</i>	The task is complete but the explanation during the interview is not enough <i>3points</i>	The Implementation is perfect and able to answer all the questions correctly. <i>4points</i>
