MONASH University

FIT2081 Mobile application development - S1 2023 MUM

Lab Specifications

Add the following features to the application you developed the previous week:

Task 1: The activity must save and restore the view data of the book title and ISBN when you change its orientation.

Task 2: The app must remember the last book added to the system. In other words, opening the app should load the attributes of the previous book added.

Task 3: Add a new button that is responsible for reloading the save attributes.

The expected output is depicted below:

fit2081-w3
